congenital cardiac surgery
Heart transplant management

Kelly Wigington MSN, CCRN

Critical Care Therapy Specialist for Continuous Renal Replacement Therapy at NxStage Medical, Inc.
Beverly Hills, California

Summary

I have previously worked for 9 years, as a Cardio-Thoracic surgery ICU Nurse at Cedars Sinai Medical Center, specializing in the management of Cardiogenic shock, CABAG, dissecting aneurysms, and the care of Pre/Post Heart transplantation, in the number one Heart transplant facility in the World. I carry certifications to manage all the devices related to the care of this patient demographic, as well as Congenital Cardiac Surgery management from the neo-nate to adulthood. I am currently participating in Cedars Sinai's pioneer program as an ECMO Nurse Specialist. I am in the process of pursuing my MSN/NP. Concurrently, I am pursuing a passion with changing a persons critical cardiac pathway, and saving lives with Abiomed. I am a clinical educator for the worlds smallest heart pump, the Impella. I assist with educating doctors, Cath labs technicians, and nurses in the insertion and management of the device as well as management and clinical support.
