Clinical Informatics Specialist at Baptist Health South Florida  
Homestead, Florida

## Summary

Board certified medical-surgical Registered Nurse with experience as a bedside RN in an acute care setting; as well as relief charge nurse, also within an acute care setting. As an expert RN within my organization, I am skilled in team management and delegation, managing the eMAR with proper order entry as well as medication administration, appropriately handling medical equipment, and Healthcare Information Technology (HIT). I have a strong background in healthcare services, also having obtained a Master of Science in Nursing Informatics.

As a nurse I believe that:

People are unique individuals, who are deserving of respect, dignity, care, compassion and excellent service. People are holistic beings (body, mind and spirit) and are different from, and more than, a sum of their parts. The environment is the internal and external world as perceived and experienced by the person. All aspects of the health care environment must support the perception of well-being for all people who enter into it.

---
