Summary

Registered Nurse with extensive, validated, clinical knowledge in emergency nursing and critical care. Currently obtaining an MSN in Leadership and Management, in order to augment current leadership responsibilities, in current professional position. My goal is to move the trajectory of my career toward gaining more responsibility in leadership, as current education progresses or finishes, using my clinical strengths, and durability with flexibility, under pressure, guiding a facility, company, or governing body, to the next step or unto an exciting goal, in an unsure healthcare landscape.
