Christy Escandon

CNO at UT Health Tyler
Dallas, Texas

Summary

As a nursing/healthcare executive with more than 20 years' experience in hospital operations and leadership, I am seeking the next challenge in my career. I have successfully led organizations to the highest level of nursing excellence, clinical quality, financial performance and fostered an environment of engagement and innovation. My teams have achieved the highest level of performance in all regulatory surveys. Additionally, I have overseen construction of two multi-million-dollar hospital expansion projects and re-designed operations from the ground up. I am interested in applying my experience and knowledge in both traditional and new business endeavors. I am outcomes-oriented with an affinity for process improvement.
