## Summary

I believe in human-centered design for enhancing patient engagement.

I'm an Emergency Room Team Leader with a demonstrated history of high performance and teamwork in the healthcare industry.

My passion is professional development and developing the force. I believe in start-to-finish programs that are individually tailored for applicants based on their interests and display care in the employee's success. Everyone's journey is different and unique, therefore the reception should reflect the employee persona for first-class results that will generate an engaged and motivated workforce.

Thanks to my business acumen and clinical experience I'm now looking to take on new projects that will challenge me and allow me to bring maximum value to the organization using HCD.

Outside the suit, to unwind from a project I'm working on, I love to play with my two kiddos Senshi & Kimiko. Also, I make mixtapes. True story, DJ'ing is a great form of expression .
