March 2019 - Present (1 year 4 months)

HCA Healthcare  
Critical Care Registered Nurse  
November 2017 - Present (2 years 8 months)

- # Identify patients' age-specific needs and alter care plans as necessary to meet those needs.
- # Perform approved therapeutic or diagnostic procedures based upon patients' clinical status.
- # Evaluate patients' vital signs and laboratory data to determine emergency intervention needs
- # Effectively manage the treatment of critically ill patients requiring CRRT.
- # Administer blood and blood products, monitoring patients for signs and symptoms related to transfusion reactions
- # Administer medications intravenously, by injection, orally, through gastric tubes, or by other methods.
- # Advocate for patients' and families' needs or provide emotional support for patients and their families.
- # Set up and monitor medical equipment and devices such as cardiac monitors, mechanical ventilators and alarms, oxygen delivery devices, transducers, and pressure lines.
- # Monitor patients' fluid intake and output to detect emerging problems such as fluid and electrolyte imbalances.
- # Monitor patients for changes in status and indications of conditions such as sepsis or shock and institute appropriate interventions.

- # Assess patients' pain levels and sedation requirements
- # Assess patients' psychosocial status and needs including areas such as sleep patterns, anxiety, grief, anger, and support systems.
- # Collaborate with other health care professionals to develop and revise treatment plans based on identified needs and assessment data.
- # Collect specimens for laboratory tests
