Summary

Increasing quality outcomes for patients through collaboration, technology, and innovative process improvements

Qualified Critical Care RN with unique combination of experience in clinical nursing, technology, training, and industrial engineering. Uses knowledge, theory, research and experience to respond to changes in clinical situations and to personalize care for patients and families. Maintains standard of care through sound understanding of the critical care population. Proven experience collaborating to improve clinical systems, leading teams, and providing training and support to hospital staff during system implementation. Serves as a resource to colleagues.

SUMMARY EXPERIENCE

- 9 years - Nursing in hospital environment on cardiac and critical care units.
- 1 year - Business Intelligence software training, installation, and report writing.
- 3 years - Developing and implementing training for software and technology.
- 9 years - Industrial Engineering and process improvement.
