ICU/CCU PER DIEM/RESOURCE POOL RN at HealthTrust Workforce Solutions
Lebanon, Tennessee

Summary

CURRENT CAREER GOAL:

Supervisory or leadership position within a progressive healthcare organization.

CLINICAL EXPERIENCE:

MedSurg Certified(CMSRN) and Progressive Care/Stepdown Certified(PCCN) with 16 years of experience (7 years in step-down and critical care areas, including CVICU, MICU). Current ICU employment. Case management experience using McKesson and Allscripts software. Proficient on multiple EMR programs and automated medication dispensing systems including Cerner, EPIC and Meditech. COVID-19 treatment of patients in ER and ICU settings.

THEORETICAL BASIS FOR CURRENT NURSING PRACTICE:

In today's world of healthcare, we must deal with a variety of challenges in acute and critical-care settings. Our first priority should always be providing a caring environment to enhance the healing process of patients. Hence, the model provided by Boykin and Schoenhofer (2001), Nursing as Caring, is a thoughtful approach in acute-care settings. The Middle Range Theory of Rozzano Locsin (2007), Technological Competency as Caring in Nursing, reflects a marriage of evidence-based and caring approaches applicable to acute and critical care areas. Finally, many aspects of Dorothea Orem's, Middle Range, Self-Care Deficit Theory (2001), are helpful when assisting patients and families in increasing independence and promoting self-care, for discharge and post-hospital care.

Goldstein, P.C. (2014). Venous Thromboembolism (VTE) Prophylaxis Part I: NSAIDs found to significantly increase bleeding risk with traditional and newer anticoagulant drugs. MedSurg Matters, 23(5), 14-15.

Goldstein, P.C. (2016). Update on Nursing and Healthcare in the Veterans Health Administration. MedSurg Matters, 25 (1), Back Cover.

PUBLISHING AND EDITORIAL:

Academy of Medical Surgical Nurses (AMSN): Journal editorial committee member - Medical Surgical Nursing, MedSurg Matters. Contributor to AMSN 2008 certification review question manual. Content reviewer (2013-2014), AMSN, Clinical Leadership Development Program (Online Learning Modules).
