Summary

I've always been surrounded around nurses in my family. Growing up watching my family members work in hospitals and clinics made a impact on my life. I understand nursing is a very challenging and demanding career; however I feel the rewards are endless. I've always been eager to pursue a career in which I am able to help and care for people, being a nurse has allowed me to fulfill this ambition. Nursing is a career for dedicated, reliable, trusting people who are able to develop relationships with patients quickly. I have these skills and I genuinely want to make a difference to people, to assist them and their families through difficult times when they are at their most vulnerable. The role of nursing is changing as nurses are far more involved in the welfare of patients, and this is placing more responsibility on nurses. I am confident of embracing this challenge and to take advantage of these changes and opportunities and use them to further my career. In the future, I may wish to pursue a career in Registered Nursing. I am deeply passionate about nursing and I am already looking forward to a long and fulfilling career in this field.
