Summary

I am a registered nurse with cardiovascular surgery and medical intensive care, emergency medicine, critical care transport, and flight experience. My interests include the management of difficult and failed airways, intra-aortic counterpulsation therapy, extracorporeal membrane oxygenation, mechanical ventilation, and point-of-care ultrasound. I am board certified in critical care, emergency, pediatric emergency, trauma, critical care ground transport, and flight nursing. I also currently hold a national certification in EMS. As an aspiring clinical educator, I am very passionate about learning, teaching and continuing education.

As a firm believer in balance and time management, I create time to enjoy my personal hobbies. Outside of work I am passionate about cross country skiing, rock & ice climbing, hiking, traveling, and cycling.
