Employee of the Month

Amanda Meza

New Graduate Nurse

Pomona, California

Summary

Bilingual New Graduate RN seeking acceptance in a New Grad Program/RN Residency, where I can utilize my professional experience and education by serving the sick and promoting health in pediatric and adult patients. Motivated professional with knowledgeable skills in behavioral health, child development, and collaborative care with strong skills in leadership, personal management, communication, responsibility, and patient safety. Hardworking student nurse with strong ability in critical thinking and proactive teamwork. Committed to nurturing, advancing, and protecting the health and well-being of patients.

Experience

LOMA LINDA UNIVERSITY BEHAVIORAL MEDICINE CENTER

Behavioral Care Assistant

April 2017 - Present (3 years 4 months)

Redlands, California, United States

Achievements: Employee of the Month Sept. 2017, Behavioral Intervention Program

Provided direct patient care to adolescents and children diagnosed with behavioral and psychiatric disorders to ensure their safety and well-being with continuous monitoring while recognizing and reporting behavioral changes. Facilitated therapeutic and strengthening groups with patients to develop healthy habits and establish improved behaviors with interdisciplinary collaboration with psychiatrists, nursing staff, social workers, and occupational therapists. Developed and supervised staff by providing orientation, training, support and direction with leadership in the Behavioral Interventions program on improving behavioral health.

Canyon Ridge Hospital, Inc.

Mental Health Worker

March 2015 - March 2017 (2 years 1 month)

Chino, California, United States

Achievements: Recognized for Best Patient Care & Safety, Supply Manager Assistant

Provided direct patient care to adolescents and adults diagnosed with psychiatric and chemical dependency disorders to ensure their safety and well-being. Assessed mental and physical conditions of clients by consulting with professionals, conducting interviews and completing assessments while facilitating groups. Selected and compiled relevant information and resources for clients to support individuals in overcoming mental and emotional problems with collaboration of psychiatrists, social workers, occupational therapists, and nursing staff.
