One Medical Group

Phlebotomist

July 2011 - September 2015 (4 years 3 months)

Practiced a meticulous and punctual work ethic in addition to always implimenting a PPE compliant technique and workspace. Provided a comforting atmosphere and experience via a collected bedside manner which included transparency regarding lab results and what laboratory tests were being ordered for the patient; further conveying information to the patient so that they could make informed decisions about their health. All experiences included an overall efficient venipuncture experience, thus, enabling patients to overcome many fears that are typically associated with labwork. Onboarded and trained new physicians and phlebotomists in regards to the ins and outs of our custom communication structures, our custom EMR, helped familiarize clinicians about the Phlebotomist's scope of practice in New York State, laboratory test panels, how to avoid overlapping test components to avoid double charging patients, Bloodborne pathogens, keeping the shared workspace aseptic, perssafe and user friendly (OSHA) as well as all the imperative information needed for EHR and EMR documentation. Taught organizational tips and tricks for managing patient expectations and their overall care.

Education
