Jodi Knowles

Registered Nurse Operating Room at Texas Health Dallas
Dallas/Fort Worth Area

Summary

I have 7+ years experience as a registered nurse in the operating room. My role is to provide excellent patient care as a circulating or scrub nurse by maintaining a safe environment during the perioperative experience. I have a background in the hospitality industry that provided a strong customer service base. My training after nursing school includes a nine month operating room specialty course provided through Parkland Memorial Hospital, one of the busiest level one Trauma hospitals in Dallas, TX. I worked various shifts for the next 3 years in all service specialties with a strong skill set in Orthopedics, ENT, Plastics, GYN, and Trauma/General surgery. I left Parkland to pursue a career in travel nursing with the hopes of expanding my knowledge base and give me insight to the variety methods of running an OR. My travels have included South Dakota, Florida, Colorado, New York, and multiple hospitals, and surgery centers in the DFW area. My travels have opened a new world of networking for me and has allowed me to strengthen my communication and relationship building skills. Working in a challenging environment such as the operating room provides me with the ability to adapt to difficult situations in any aspect of life with confidence. I am enjoying a travel life style as of now, but my mind is open to some different business opportunities. I am an extroverted, driven person with a passion to live up to my highest potential.
