Hospital & Health Care Professional

Hillsborough, New Jersey

Summary

Experienced ICU RN. Worked with surgical, trauma, medical, & open-heart patients. Strong Assessment skills with great bedside manners.

My passion is to help people to live a healthier and more productive life. I worn many hats in my professional career- Oracle software developer, IT recruiter, and then last but not least Intensive Care Unit nurse. As a result, I developed a keen eye for details and critical thinking. But actual experience has taught me that my professional value boils down to the following:

- Work well with teams on achieving a specific goal.
- I am a multi-linguistic nurse. I speak fluent Arabic, marketer, salesperson, trainer, and advocate for children with mental illness.
- I enjoy teaching and reaching out to people.

I love making new professional acquaintance. Reach out if you want to talk technology, business or jewelry.

Specialities: Critical Care, Communications, Electronic Records, Nursing informatics, Social Media Marketing and business development.

Experience

Self-employed
