Cleveland, Ohio

## NEW ENGLAND ASSEMBLY OF STUDENT REGISTERED NURSE ANESTHETISTS INC

Fundraising Chair (Former VP)  
June 2015 - June 2018 (3 years 1 month)  
Hartford, Connecticut

In this one of a kind regional student group, seven student board members collaborate to build networking, scholarship, mission trip, and career opportunities for student registered nurse anesthetists from twelve programs across New York, New England, and New Jersey. Each year for the past four years, we have grown our social media networks and scholarship awards. I will miss being a part of this force and trust the next generation of students to carry its mission even further.

## Bridgeport Hospital

10 months

### ACLS Instructor

July 2015 - February 2016 (8 months)

### MICU/CCU- Professional Nurse I

May 2015 - February 2016 (10 months)

Bridgeport, CT

Provides direct nursing care to critical cardiac and medical patients in an urban set, 16-bed unit. Implements appropriate guidelines for suspected sepsis, respiratory decompensation, acute alcohol withdrawal, stroke, coronary event, massive transfusion, and post-arrest care. Utilizes pulmonary artery catheters, intra-aortic balloon pumps, PiCO devices, and the Impella 2.5. Supports coworkers' professional development by providing resources for educational opportunities and professional certification.

## Duke University Health System

2 years 9 months

### ACLS Instructor

January 2015 - April 2015 (4 months)

### Clinical Nurse II

August 2012 - April 2015 (2 years 9 months)

Cardiothoracic ICU

Provides direct care for patients in the immediate post-operative period alongside a world class interdisciplinary team in a 32-bed, Magnet Recognized unit. Progresses patient to step-down phase of care in a high turn over environment. Monitors advanced hemodynamics with pulmonary artery catheters, LiDCO, Intra-Aortic Balloon Pump, and other non-invasive measures. Manages various mechanical circulation devices including HeartMate II, Heartware, CentriMag, Impella CP, Rotaflow, Thoratec PVAD, and Extracorporeal Membrane Oxygenation (ECMO) devices. Initiates emergent resuscitative measures including Cardiac Advanced Life Support (CALS protocol) and hypothermia therapy post-resuscitation. Facilitates patient and family-centered care receiving frequent positive feedback from families' experiences. Promotes patient safety and best practices with participation in the unit's Clinical Practice Council and Performance Improvement Committee. Supports education of the unit as a preceptor and "Pacer Champion".

## Polar Ice House

#### Private/Group Instructor

November 2012 - April 2015 (2 years 6 months)

Cary, NC

PSA trained instructor. Teaching figure skating and hockey skills to students of all ages and levels.

#### Yale University School of Medicine

Research Transcription Consultant

May 2008 - July 2012 (4 years 3 months)

Led by Dr. Kevan Herold of Yale University, this Phase 2 trial funded by NIDDK is for patients ages 8-30 with type 1 diabetes mellitus within 4-12 months of diagnosis. Teplizumab, also called MGA031 and hOKT3-gamma-1 (Ala-Ala), is a humanized monoclonal antibody engineered to alter the function of the T lymphocytes that mediate the destruction of the insulin-producing beta cells of the islets of the pancreas. Teplizumab binds to an epitope of the CD3-epsilon chain expressed on mature T cells and by doing so, may modulate the immunologic response that causes disease.

#### Boston Children's Hospital

Clinical Assistant

September 2011 - June 2012 (10 months)

Cardiac ICU

#### Beth Israel Deaconess Medical Center

Nursing Assistant

May 2011 - March 2012 (11 months)
