Courtney Brady-Naftaly, CMSRN

Assistant Nurse Manager at Northwell Health
Greater New York City Area

Summary

I am a positive, energetic, and passionate RN that happens to be a huge supporter of self-growth. I not only believe that every moment we experience is an opportunity for learning and improvement, but it excites me. I have an insatiable hunger to improve on my education and better myself. This helps me in my journey as an RN because I am always ready and willing to learn, no matter who is the teacher or what their level of education is. I am currently the Co Chair for the Collaborative Care Council, and sit in the Chief Nursing Officers cabinet meetings monthly to learn more about issues we face as a hospital, and to initiate change to solve those issues. I am a tremendous patient advocate, and only put forth the highest quality care for my patients as well as staff. My positive and up-beat attitude helps promote a happy and exciting work environment as well as an open line of communication for anyone who needs help. I take my work extremely serious, and put 110% in every thing I do. I am a big believer in checking, re-checking, and checking again! In a profession where a mistake could be extremely detrimental to someones health, I ensure that I minimize the margin of error as much as I possibly can. I am currently an Assistant Nurse Manager with experience in treating Med-Surg, Telemetry, Stroke, Oncology, and Pulmonary patients. I have earned the title as a Diabetes Champion, where I am a resource for my unit as well as other units in the hospital for any questions or help in educating patients newly diagnosed with diabetes! I love teaching and helping patients as well as fellow nurses, and was honored to have received the national Mentorship Award from Northwell Health. I am truly so lucky to be a nurse and can not wait to see what my future holds. Below is a research paper I did while externing at Memorial Sloan Kettering to help decrease complications and increase patient outcomes while people are receiving cancer treatments!

Experience

Northwell Health

4 years 9 months

Assistant Nurse Manager

June 2019 - Present (1 year 2 months)

Long island Jewish Medical Center

Telemetry
