Summary

I am a seasoned nurse clinician and manager as well as a freshly minted healthcare leadership & administration graduate from the University of Texas Arlington with 27+ years of operations leadership and patient care experience in the emergency medicine arena. Recognized for demonstrating a natural aptitude for workflow optimization, as well as for maintaining records management systems and evaluating personnel, I have a history of contributing to clinic growth and expansion throughout my career. Professional focal points include clinical data analysis, operational optimization, care quality assessment, multicultural inclusion, recruitment & hiring, management development, compliance assurance, community engagement, records management, analytical reporting, financial administration, technology solutions, and client relationship management. Delivering superior administration on the latter areas of expertise requires utilization of effective communication skills, and resource management to support efficiency and maximum returns.

Currently, I am the Nurse Clinician 5, Emergency Services with UTMB Angleton Campus. Under my leadership, I apply advanced nursing and clinical skills to evaluate, plan, and execute appropriate patient care in emergency situations. I liaise with senior leadership, external care providers, and nursing teams to ensure the campus's operational support structure is driving superior clinical practice with minimal expenditures.

Colleagues describe me as a progressive, driven, down-to-earth, analytical and managerial expert who can be relied on to offer superior solutions that deliver efficient results on time and under budget.

I am pursuing new opportunities and can be reached through this profile, or by phone at 919-801-8319

Experience
