April 2008 - July 2016 (8 years 4 months)

Portland, Oregon

Bedside nurse delivering direct patient care in a 28 bed, combined medical, surgical, cardiac critical care unit.

- Spearheaded the multi-faceted development and implementation of a Massive Transfusion Protocol in a non-trauma critical care unit. Educated and trained the entire critical care staff on the protocol.

- Wrote the policy and procedure for the Belmont Rapid Transfuser machine to be used during massive transfusion emergencies. Educated and trained the entire critical care nursing staff as well as nurse practitioners and physician assistants on this new to the unit critical device.

- Presenter at 4 NW nursing conferences 2014-2015.

- Nominated in 2012 for the "Preceptor of the Year" award.

- Trains novice nurses new to the ICU, and experienced ICU nurses new to specialized equipment.

Patient populations and experiences including, but not limiting to: open heart surgery, intra-aortic balloon pump, kidney and liver transplant surgery, severe sepsis, CRRT, respiratory failure, neurosurgery and neurosurgical devices
